Ronald D. Johnson
Joon Hyak Kang
Lynelle M. Weldon

Lecturers

Elvira Baumgartner
Keith G. Calkins
Shirleen Luttrell

Mathematics is foundational to physics, engineering, and computer science, and is increasingly important in many fields of study such as finance, accounting, economics, biology, medicine, and environmental science. Students majoring in these and other fields will find that acquiring an additional major in mathematics or math-

apply toward any General Education requirements. Prerequisite:
Acceptable MPE score.

elementary probability and probability distributions, statistical inference involving binomial, normal, and t -distributions, and
