Speech-language pathology and audiology are two disciplines that focus on communication problems. Speech-language pathologists work with individuals who have difficulties (1) learning to speak, (2) understanding others, (3) using their voices, (4) speaking fluently, and (5) feeding and/or swallowing. Audiologists work with individuals who have difficulty with (1) hearing, (2) central auditory processing, and (3) dizziness.

A major in speech-language pathology and audiology offers pre-professional education for those interested in becoming speech-language pathologists or audiologists. Students may observe and work with individuals who have a variety of communication disorders both in the department and at a number of clinical sites in surrounding communities.

The major may be completed during a slotws. senior years. Individuals desiring to become speech-language pathologists must obtain a master's degree. Individuals desiring to become audiologists must obtain a clinical doctorate or PhD. Details of graduate programs are available through the department office.
