ETS® Proficiency Profile

Summary of Scaled Scores
To show the ability of the group taking the test

Test Description: Standard Form A

Number of students tested: 366

Number of students included in these statistics: 359

Number of students excluded (see roster): 7

Cohort Name: Fall 2011 - Summer 2012

Close Date: 08/09/2012

Student Level: All Seniors

	Possible Range	Mean Score	95% Confidence Limits* for Mean	Standard Deviation	25th Percentile	50th Percentile	75th Percentile

students and sampling of questions as factors that could cause the mean score to vary. The confidence limits indicate the precision of the mean score of the students actually tested, as an estimate of the "true population mean" - the mean score that would result if all the students in the population could somehow be tested with all possible questions. These confidence limits were computed by a procedure that has a 95 percent probability of producing upper and lower limits that will surround the true population mean. The population size used in the calculation of the confidence limits for the mean scores in this report is 359.

Demographic Analysis Reports

The following tables provide comparison scores for specific groups. The mean, or average, score is presented at the top of each cell, with the standard deviation below in parentheses. Rows with less than four were omitted to preserve anonymity. Therefore, student numbers for the groups may not always add up to the total.

Gender

	Number	Total Score	Critical Thinking	Reading	Writing	Mathematics	Humanities	Social Sciences	Natural Sciences
