**Andrews University** 

# **NSSE 2019 High-Impact Practices**

About his Report

## About Your Report

Due to their positive associations with student learning and retention, certain undergraduate opportunities are designated "high-impact." High-Impact Practices (HIPs) share several traits: They demand considerable time and effort, facilitate learning outside of the classroom, require meaningful interactions with faculty and students, encourage collaboration with diverse others, and provide frequent and substantive feedback. As a result, participation in these practices can be life-changing (Kuh, 2008). NSSE founding director George Kuh recommends that institutions should aspire for all students to participate in at least two HIPs over the course of their undergraduate experience—one during the first year and one in the context of their major (NSSE, 2007).

NSSE asks students about their participation in the six HIPs shown in the box at right. Unlike most questions on the NSSE survey, the HIP questions are not limited to the current school year. Thus, senior students' responses include participation from prior years.

### Report Sections

Participation Comparisons (p. 3)

Displays HIP participation for your students compared with that of students at your comparison

#### \$verall % Participation

Displays the percentage of students who participated in one HIP and in two or more HIPs, relative to those at your comparison group institutions.

#### Statistical Comparisons

Comparisons of participation in each HIP and overall for your students relative to those at comparison group institutions, with tests of significance and effect sizes.

Response etail (pp. ! "#)

Provides complete response frequencies for the relevant HIP questions for your students and those at your comparison group institutions. First-year results include a summary of their expectations for future HIP participation.

Participation by Student Characteristics (p. 6) Displays your students' participation in each HIP by selected student characteristics.

#### Interpreting Comparisons

H p rt p ton r s or on st nts t n n nst t ton t n t o s t n nst t tons, like many experiences and outcomes in higher education. As a result, focusing attention on overall participation rates amounts to examining the tip of the iceberg. It is equally important to understand how student engagement (including HIP participation) varies t n your institution. The table on page 6 provides an initial look at how HIP participation varies by selected student characteristics. The Report Builder and your or F, port (both to be released in the fall) offer further perspectives on internal variation and can help you investigate your students' HIP participation in depth.
