

# Navitus Drug Formulary Q&A

A drug formulary is a list of generic and brand name drugs identified as "preferred" or best in class based on overall value (i.e. effectiveness, outcomes and cost). We have a 5 tier formulary:

1. Generic Preferred
2. Generic Non- Generic N. Generic drugs will be disper

Yes, you will be responsible for the difference in cost between the brand and the generic, applicable deductible, coinsurance, and/or copay.

The formulary is dynamic, and may change monthly. Changes will be based on new drugs that become available and/or the latest medical studies on treatment outcomes.

d after a \$0 co-pay, with a prescription. In addition, the Affordable  
OTCs, and these are listed on the formulary.

. There will be other drugs on the formulary in the same therapeutic category (may be brand or generic) as the drug you are taking. Contact your provider to determine the best course of action. If your drug is the only drug in the therapeutic category, it will be considered "Brand Preferred".

. The Navitus Customer Care Team is staffed with pharmacy experts who review current prescriptions and will offer cost saving suggestions. Navitus can be reached at (866)333-2757.

. Effective 7/1/17, we have negotiated new network contracts for our retail pharmacies. We will no longer consider Walmart, CVS, Kmart (and a short list of other independent pharmacies) as "in-network". See your Employee Benefit Guide for additional information. Rite Aid, Walgreens, Meijer and others continue to be cost effective locations to fill prescriptions.

. Yes. Navitus can be reached at (866)333-2757 for cost comparison information. The Navitus member portal's "Cost Compare Tool", or [www.GoodRx.com](http://www.GoodRx.com) are real-time websites with current drug pricing.

. It is very possible! Contact Navitus or search the prescription drug name and coupon in an internet search engine (E.g. "Zocor coupon").

. If a member chooses to go to an out-of-network pharmacy, his/her medication price is dictated by
