

*If there are no known risks, state: I/We do not anticipate any risks from participating in this research.*

For research which may i

**Statement of Consent** (*Signed consent is not necessary in all situations, and will not be possible if your study is anonymous. If you think that signatures will jeopardize your research or not possible or practical, please describe, in your IRB application how you plan to document consent. For an online experiment asking participants to click on an “I approve” box should*
